

ENGINEERING LOG  
SIR MARK A POWER PLANT

Cashman

DATE \_\_\_\_\_

REMARKS (CONTINUED)

In the Spring of '55,  
On the 18th day of May,  
The Ball was alive,  
Libby said "Okay".  
With the Admiral at the throttle,  
SIR neutrons in the bottle,  
Mark A made first power,  
And Seawolf hopes did tower.

(Signed) *C.S. Carlisle*  
Submarine Shift Supervisor

Those named below, who were there,  
And therefore know the best,  
Have examined this with care,  
And to it do attest:
